25 YEAR RE-REVIEW

SECRET

25X1

At 10 a.m. on 5 March, a column of 55 motorcycles with 4 x 82-rm mortars, armored personnel carrier 3 x 57-mm AT guns coupled to trucks of	
9 trucks	25)
wearing red-bordered black enaulets moved from Augermuender Strasse toward Tramper Chaussee and proceeded in a southerly direction.	rs

	┛.
Correct. Both columns belong to signal units of the GOFG.	OEN
Description of the GOFG.	25X
. Motor vehicle is indicative	25
of equipment of the barracks installation in Golm and, thus, it is assumed	25.
that the signal unit of the GOFG stationed there is identical with the	
afore mentioned unit and that it is equipped with decimeter equipment.	
To 15 of the form of the first to the first	25
	20
Comment. units of the 2d Gds	
AAA Div. movements in the opposite direction were noticed.	25
it appears that troops had been relieved at the AAA emplacements in	20
Wuensdorf.	
Corment. The information indicates that the combat firing observed	25
in January and February continued until early Merch at the Wittstock troop	
training grounds.	25)
	
Comment. Observations Indicated	_25X
that the Schuetzen Kaserne is occupied to capacity.	\
indicated that no troops were dispatched from	
Eberswalde prior to 9 March. The fact that the installation was only	25X
partially occupied is therefore believed to have been due to local field	
exercises. This is supported to some degree by the observation of the column	a n .
on 5 March, which possibly returned from such an exercise. The weapons	
indicate that the units concerned were elements of the 51st (?) Mtrcl Regt	
of the Fourth Gds Mecz Array.	25.
